CURRICULUM VITAE

Name:	**Pradeep Gandu**
Address:	Bernsdorfer Str. 115, 09126 Chemnitz, Germany (ready to relocate)
Contact:	+49 176 59677415 | gandupradeep2026@gmail.com
Links:	LinkedIn | GitHub | Portfolio
Languages:	German (C1, UNIcert III), English (C1, fluent)
Status:	Indian citizenship | Available full-time from 01/2027
Residence:	Job-seeker residence permit from 01/2027 (§ 20 AufenthG)

PROFILE

Studies	Master's student in Automotive Software Engineering at Chemnitz University of Technology, thesis on datasets for autonomous driving
Core Skills	Professional experience with GCP data pipelines (BigQuery, Airflow, PySpark), SQL, Python and RAG systems
Availability	Full-time from 01.01.2027 | ready to relocate anywhere in Germany

PROFESSIONAL EXPERIENCE

02/2025 – 09/2025 **Working Student – AI Software Solutions**, DiPP GmbH, Chemnitz, Germany
- Engineered modular RAG pipelines and generative AI solutions for enterprise CRM software
- Standardized AI tool interfaces via MCP for privacy-compliant on-premise inference
- Handled SQL database operations on customer data and solved CRM administration issues

Technologies: Python, FastAPI, RAG, Ollama, Qwen, MCP, REST APIs, Git

12/2021 – 07/2022 **Translator & Data Specialist (Patent Data)**, Ascent Staffing Solutions, Hyderabad, India (Client: Clarivate)
Translated German patent documents into English, fetched and wrote back the data with SQL

10/2020 – 12/2021 **Associate Language Specialist (Content Engineering)**, GlobalLogic, Hyderabad, India (Client: Google)
- Predicted product demand from supermarket transaction data with multiple linear regression
- Trained and evaluated classifiers with Python, scikit-learn and PyTorch (F1-score)
- Applied OCR (Tesseract) and CNNs to extract data from German retail documents

Technologies: Python, scikit-learn, PyTorch, Pandas, NumPy, Linear Regression, NLP, Git

09/2017 – 10/2020 **Senior Operations Engineer**, Cognizant Technology Solutions, Hyderabad, India (Client: Meta)
- Built ETL/ELT pipelines that load source data into layered BigQuery datasets
- Modified BigQuery SQL, Airflow DAGs and PySpark jobs, built authorized views in a team
- Designed unit tests, ran SIT and fixed SIT/UAT defects and production incidents

Technologies: GCP (BigQuery, GCS), Airflow, PySpark, SQL, Python, GitHub

03/2016 – 05/2017 **Practitioner – CRM Operations**, Concentrix Daksh Services, Hyderabad, India (Client: Google)
Cleaned Google Ads data with SQL and Python, trained models in a team

06/2013 – 06/2015 **Associate Software Engineer**, Magus IT Solutions, Hyderabad, India
Database development with SQL Server and Python, deployment on AWS EC2 (Linux, Apache Tomcat)

SELECTED PROJECTS & RESEARCH

Master's Thesis

Scenario-Centric Dataset & Trajectory Pipeline, Chemnitz University of Technology
- Automated scenario simulation in CARLA 0.9.15 with synchronized data extraction
- 3D boxes, trajectories, speeds and road geometry as JSON datasets for ML
- Temporal continuity and collision-free validation for ML training data readiness

Technologies: Python, CARLA 0.9.15, OpenDRIVE, YAML, 3D Trajectories

Research

Research Internship: Autonomous Bus Parking System, Chemnitz University of Technology Grade: 1.7
- YOLOv8 detection of bus stops and passengers in CARLA
- Matched bus and stop IDs, overtook obstacles still blocking after a 3 to 4 s wait
- Continued after passengers boarded, end-to-end from data to simulation

Technologies: YOLOv8, CARLA, Computer Vision

Cloud Pipeline

Automotive Telemetry Streaming Platform (GCP) GitHub
- Event-driven telemetry ingestion with stateful deduplication in Apache Beam (Dataflow)
- Loaded partitioned BigQuery tables, orchestrated with Airflow
- Dead-letter queue (DLQ) routing and CARLA vehicle telemetry ingestion via Pub/Sub

Technologies: GCP (BigQuery, Pub/Sub, Dataflow, GCS), Apache Beam, Airflow, Python

EDUCATION

10/2022 – 01/2027 **M.Sc. in Automotive Software Engineering**, Chemnitz University of Technology **90 / 120 ECTS**
Master's Thesis: *"Generation and Annotation of Scenario-Centric Datasets for Environment Prediction in Autonomous Driving"*
Focus Areas: Distributed Systems, Software Architectures, ADAS, Simulation Technology

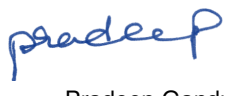

09/2017 – 09/2019 **M.Tech. in Embedded Systems**, MLR Institute of Technology (JNTUH), Hyderabad, India
Final Grade: First Class with Distinction (CGPA: 7.33 / 10)
Focus Areas: Real-Time Operating Systems, System Architecture

SKILLS & QUALIFICATIONS

Cloud & Big Data	GCP (BigQuery, Pub/Sub, Dataflow, Cloud Composer / Airflow, GCS), AWS (EC2, S3, RDS), Spark (PySpark), Kafka, Snowflake, Databricks, Data Lakes, Data Warehousing, ETL/ELT, Oracle Cloud (OCI)
Programming	Python (FastAPI, Pandas, NumPy, scikit-learn, PyTorch), SQL (Expert), Core Java, Bash
DevOps & Tools	Docker, Kubernetes, Git, CI/CD (GitHub Actions, Jenkins), Linux (Ubuntu, Debian), Nginx, Jira
Training	Google Cloud Data Engineering (GCP) • Generative AI & RAG (IBM SkillsBuild) • Python Essentials 1 & 2 (Cisco / OpenEDG) • SQL (HackerRank)
Honors & Awards	Client Excellence Awards (Bitwise & Global Payments) for the Netezza to BigQuery cloud migration

CAMPUS ENGAGEMENT, SPORTS & INTERESTS

University Sports	**Badminton Community, Chemnitz University of Technology (University Sports Center)** Badminton trainer (part-time) since 10/2025 and founder, full-stack developer and volunteer administrator of the community platform
Interests	Badminton, Cloud Data Architectures & Open-Source Software Development, Cycling

Chemnitz, November 2, 2026 Pradeep Gandu
